Roles and Responsibilities:

➤ **Adobe Target:**

- Delivered personalized digital experiences using Adobe Target for A/B testing, experience testing, and web personalization. Built client-side activities using JavaScript, CSS, and HTML, collaborating with product and analytics teams to support experimentation strategies and optimize customer journeys.
- Performed **QA, debugging, and troubleshooting** to ensure accurate activity delivery, targeting logic, and experience rendering.
- Implemented **server-side personalization** using Adobe Target **Delivery API** via Postman, passing profile and contextual attributes for real-time decisioning and advanced targeting scenarios.
- Created and validated **audiences programmatically** using Delivery API and ensured correct activity execution through API response validation.

➤ **Adobe Audience Manager:** Created and managed **traits, audience segments, and destinations** using behavioral and contextual data. Built rule-based and sequential traits, combined them into reusable segments, and activated audiences via destinations to support targeted personalization use cases. Validated segment qualification and destination delivery during QA cycles.

➤ **Adobe Launch & Web SDK:** Implemented Adobe Launch for web data collection by configuring rules, data elements, and extensions. Integrated Adobe Target and Adobe Analytics using Adobe Web SDK to ensure unified, reliable data flow. Implemented data provider concepts to pass business-specific attributes and validated end-to-end tracking through QA and debugging.

➤ **Adobe Analytics (DataTrue):** Created and configured Adobe Analytics report suites in DataTrue and ensured accurate tracking through Adobe Launch. Tested and validated Analytics tag execution, beacon firing, and variable mapping using browser developer tools and Adobe Debugger to ensure consistent and reliable data collection.

➤ **Adobe Experience Manager (AEM):** Set up AEM on the local development environment and developed reusable components using core components. Created pages and configured IMS integration through Adobe Developer Console for secure cloud service access. Built Experience Fragments (XF) and integrated them with Adobe Target to enable content reuse and personalization
